All prices subject to change.

Our Community

This remarkable opportunity is available and timely - you can buy now and build later, using some recommended well known preferred builders, we can help you design the perfect home to fit your architectural design with mountain luxury.

Easy Build, City Perks

Country living doesn't have to cost you your city perks. The Farm at Cane Creek lots are all easy to build on sites with underground utilities. You don't have to give up your city perks - we even have fiber-optic high-speed internet and highly rated schools.

Mini-Farm Lots

Choose the farm life you want - lots are 1 acre to 4 acres where you can choose to build a garden or have a horse or do nothing all but enjoy the rolling valley. Cane Creek is known to be a horse community so you won't be alone. You will find plenty of trails and we are just a short drive to Tryon International Equestrian Center (TIEC)! Others can choose to plant a flower or vegetable garden - just down the road, you will even find a wildflower garden where the public can pick their own flowers. Either way, you choose and if you don't want to do anything but enjoy the pastoral setting just as it is, there's no judgment here. Many love this area of Asheville just for that. It's off the beaten path and yet close to central Asheville.

Noteworthy details:

Minimum Home Size 1,750 Square Feet of Heated/Cooled Living Area

Internet Service Project Update
The Farm at Cane Creek

July 15th, 2020

To: Property Owners of The Farm at Cane Creek

From: Skyrunner, Inc
5 Ravenscroft Drive
Asheville, NC 28801
(828) 258-8562
helpdesk@skyrunner.net

The best internet has been installed at The Farm at Cane Creek! Skyrunner, Inc., a regional Internet service provider, has begun installing homes with faster, more dependable Internet service within The Farm at Cane Creek. Our teams have been working diligently to install fiber optic cable infrastructure throughout the community. Service will be available to homeowners at the following rates:

- \$75/mo - Fiber 250 - speeds up to 125x125 Mbps, 250GB/mo, overages are 50¢ per GB
- \$99/mo - Fiber 500 - speeds up to 125x125 Mbps, 500GB/mo, overage are 50¢ per GB
- \$115/mo - Fiber Unlimited - speeds up to 125x125 Mbps, unlimited usage

There will be a one-time installation fee of \$150 for your Internet connection. Installation includes running a fiber optic cable to your home, installing a small outdoor enclosure on the back of your home, and providing an Ethernet connection to a better Internet experience (included in the installation cost). Once your service is installed, you will need to decide on how you want your internal home network setup. Most homes today want WIFI service for computers, TVs, tablets, and phones available throughout the house. For an additional cost, Skyrunner can provide home networking services, including running Ethernet network cable in your house, installing wireless access points for WIFI coverage, and helping you configure your devices to connect to the Internet. Skyrunner will provide a price list of home networking options upon request. Of course, you can purchase your own wireless router and set it up yourself, or you can hire one of the many regional home networking and automation providers in the area to assist you.

Skyrunner is excited to be a part of building a stronger community at The Farm at Cane Creek. We look forward to continuing to work with you all.

Best regards,
Zach Thompson, Project Coordinator - zacht@skyrunner.net
